Log in/Sign up

After downloading the app, you can login with the same credentials that you used to sign up for the internship program.

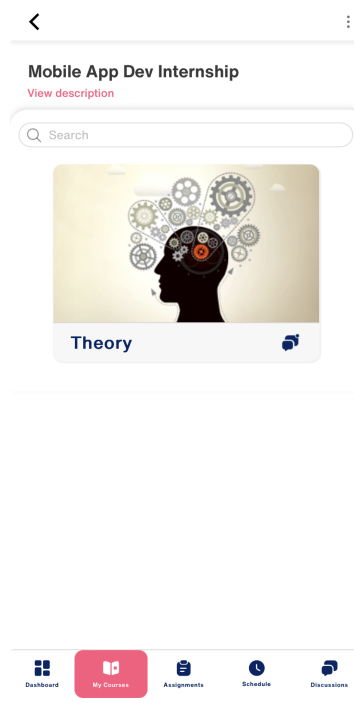

If you don't remember the password you used when you applied for your internship, you can reset your password. To reset the password, click on the 'Forgot Password?' link as shown.

## Step 2: Start the Mobile App Dev Internship Course

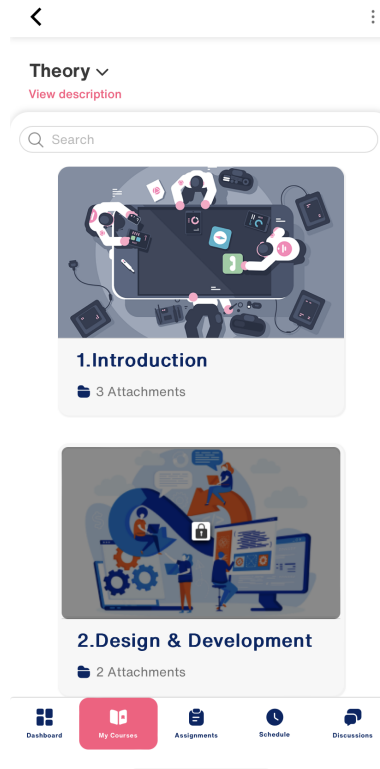

Click on the My Courses button in the lower navigation menu, you will be able to see the 'Mobile App Dev Internship' Course. As shown below:-

Click this to view the Theory subject as shown below.

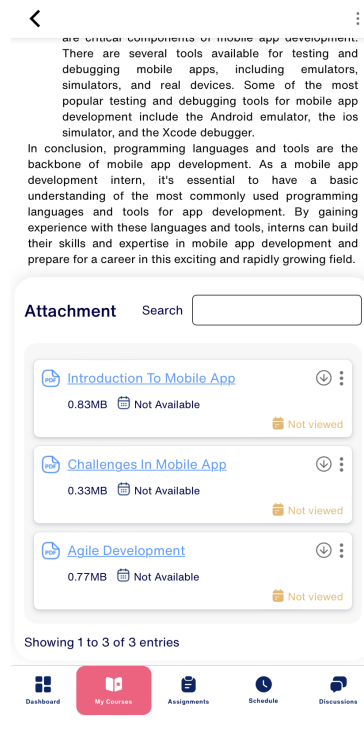

Within the Theory subject, the Introduction module will be accessible to you

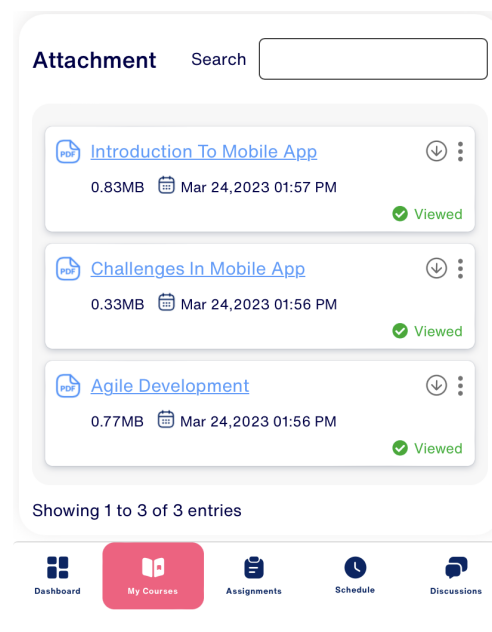

As you can see, the 'Design & Development' module is currently locked. Click on the Introduction module to view the materials and make sure to read on, to find out how to unlock the rest of the content.

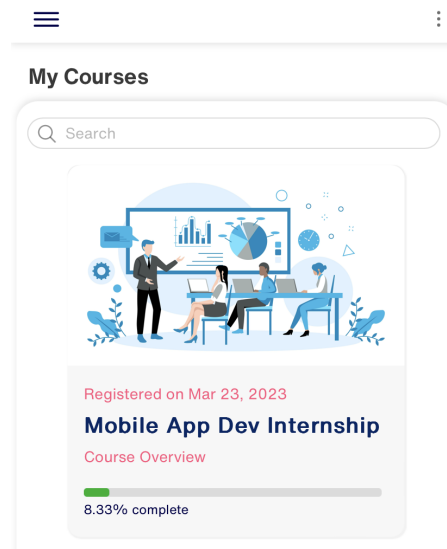

You can read through the introduction as shown and when you have finished, you will see the screen below.

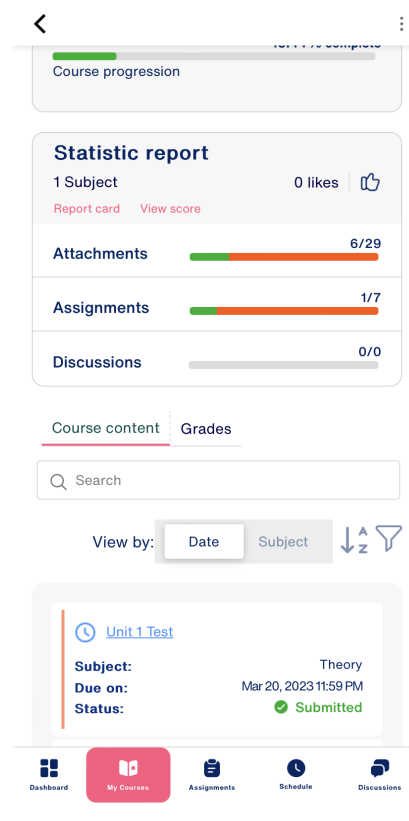

Read through the attachments. Once you have gone through the materials, your screen should show that all three of the materials have been 'Viewed' as shown below.

The progress you have made will show up in the My Courses navigation menu as 8.33% as shown below. This number will keep increasing as you progress through the course.

After you have studied the slides and are ready to be assessed, you can always use the Course Overview to find your next task. At this stage, you should see the first assignment. You can also click the Assignments button on the lower navigation menu to find the list of assignments accessible to you. Only after completing each assignment will you be able to view the next module.

Attain a score of **at least 70%** in each assignment to **unlock** each subsequent part of the course. Every assignment has a discussion related to it, found in Discussions. Please use this tab to ask any questions to the instructors.

## Step 3: Complete the online/theory part of the program

Now, when you go back to the Theory subject, you will find the Design & Development module **unlocked** as shown below.

You can always use the Dashboard to pick up right where you left.

Complete the rest of the modules till 'Debugging Tech' in this manner until you have finished the materials. This will unlock the "Hands-on Project" Subject.

## Step 4: Participate in the Industry visit

Once you have completed the Theory subject, please put a message in the Discussions menu. This will let us know that you are eligible for the industrial visit. When you Choose people, add the instructors 'Jude Raj' and 'Tina Samuel' or tag them when posting using the @ symbol. By default, All People will see your post, you can change this setting for any discussions you create.

To participate in the Industrial visit at Nila Apps, you will need to **finish** the 'Theory' subject.

## Step 5: Complete the hands on project

Utilising the knowledge that you have just acquired is extremely important to understand what you have learned. Once you have completed all the lessons in Theory, you can start your Hand-on Project. This consists of 4 assignments and will require the software, Android Studio. The details are in the course materials. Follow the instructions given within each instruction and upload screenshots of your results to each assignment.

## Questions?

For any doubts or questions, use the Discussion tab in the menu. There may be others who have asked the same question as you, therefore, please make sure that you search for your query before posting a new question. The instructor will answer all your doubts. If you would like to schedule some time with the instructor, click on 'Schedule' and then 'Request a meeting'. Select a time slot and your request will be sent. After your request is approved, please be ready for the meeting with the instructor. Make sure to thoroughly utilise the short time and ask your doubts.

All the best!
